Q2 1a) Do you believe that there is sufficient transparency in the pricing of goods in Jersey? **No**

Q3 1b) What policies, if any, will you support to promote more transparency in Jersey prices, notably when comparing prices against the same products in the UK?

I believe more transparency is required when costing products that sell at a cheaper price in the UK.

Shipping prices vary from company to company and depending on where in the world products are being shipped from. I think further investigation needs to happen on my side before I could make an informed decision.
